

Corrugate

Strength that
has withstood
the test of time.

Corrugate

Back in 1955 Calder Stewart started out building dog kennels and hay barns for the rural communities of Southland & Otago. An honest, reliable service and great products meant the demand grew to a point where it made sense to purchase a corrugate roofing machine. 1970 saw the beginnings of the Calder Stewart Industries roofing division, providing cut-to-length corrugated iron for farm buildings and the general public. The roofing division has grown considerably since, offering an extensive range of products and a nationwide service. Corrugated iron to this day is the cornerstone of the roofing division and one of New Zealand's most trusted roofing profiles. Whether it's a barn, a sleep out or your dream home, Calder Stewart's corrugated iron profile has stood the test of time and will look great year after year.

So, if you're after a smart roof that's going to last, call 0800 115 232 or visit us at roofer.co.nz
